

# RB211-535 E4 Borescope Inspection

## Course syllabus

Training level ATA 104 Level IV

---

**Target population** Personnel who specialise in borescope inspection damage assessment

---

**General description** The course identifies the borescope access ports, identifies and locates all the relevant information on engine damage limits, in the aircraft or engine maintenance manuals, and reviews their impact, identifies and explains the requirements of all scheduled, non-scheduled or special inspections applicable and provides practical training with all the necessary equipment to make the inspection on each engine type.

---

**Notes** Students should be engineers, mechanics or personnel involved in borescope inspection and assessment.

---
